TULIP PLANTING

In bordering a bed it is recommended that they be staggered 6 to 8 inches apart.

To enhance a flower border, groups of 6 to 12 tulips of one variety are very effective. A large bed is best planted in triangular wedges of 25 to 100 bulbs each, arranged so that they make a continuous pattern.

Plant bulbs 5 to 6 inches deep and if soil is heavy, the addition of some sand and bone-meal will help the growth and bloom ability of the bulbs.
